- 0.2 **213.2** R into HQ (ARRIVÉE)

## Beacon RCC Cotswold Audax

### Using the route sheet (written step-by-step directions)

*The following abbreviations are used:*

L = Left

R = Right

T = T junction (priority against the rider)

X = Crossroads (priority against the rider)

sp = Signpost(ed)

SO = Straight on

RAB = Roundabout

Imm = Immediately

Y = Y junction

Cont = Continue

The route goes through a place only if the place name is in **bold** type. Carry straight on at junctions where you have priority, unless the directions indicate otherwise. Such junctions are mentioned in the directions only where there is a good reason. Junctions with poor sight lines and junctions where you are most likely to meet heavy and/or fast-moving traffic are marked !

We recommend using the route sheet in combination with a bike computer to check progress against the quoted distances. Check out the next instruction straight after each junction: in some places, the turns follow each other in quickly. Audax UK advises riders to study the route in advance and to carry a map. The route is covered by O/S 1:50,000 Landranger sheets numbers 139, 150, 151, 163 and 164. If you follow our directions carefully, you won't normally need to refer to a map. Nevertheless, having one with you can be an enormous help if you go off course or run into problems.
